

Human
development
Module 1
Topic/Week 2

- Survey course – broad rather than deep
- 12 weeks conception to death
- Perspectives: Western and Indigenous perspectives (Including Māori and Pacific perspectives)
- Final week module 1
- Quiz – be prepared
- Textbooks - sorted

1

Theories of
development:

Key theories:*

- Behaviourism,
- Bronfenbrenner,
- Baltes,
- Piaget,
- Vygotsky,
- Erikson

*Broad overview –
zoom in later when applying to stages

2

Theories of development:

- External influences on development - environment and sociohistorical impacts
- How internal development happens – nature of being human - cognitive, social and socioemotional all same all over world

3

Behavioural theories

- Focus on external drivers of cognitive development (learning and thinking changes over time)
- Passive individual (response to environment)
- Conditioning: Classical (reflex e.g. Pavlov) and operant (punish / reward)

4

Examples of behavioural theorists

- Behaviourist like Watson, Skinner and Pavlov
- Theory of response and conditioning
- Move away from Freud
- Looked at what people DO / how they behave

5

Before Conditioning

During Conditioning

After Conditioning

6

Positive Reinforcement - The Big Bang Theory

7

Taylor wears a suit to school.
Taylor's peers laugh and make fun.

8

- What kind of consequence is this?
- Punisher or reinforcer?
- Positive or negative?

9

Taylor makes straight A's at school and Taylor's parents decide that Taylor does not have to do chores for a month.

10

- What kind of consequence is this?
- Punisher or reinforcer?
- Positive or negative?

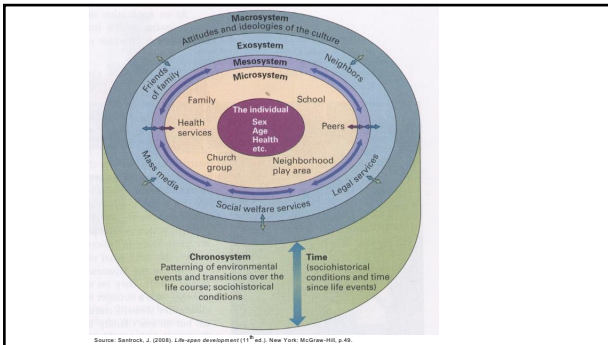

11

Bronfenbrenner:
Development in context

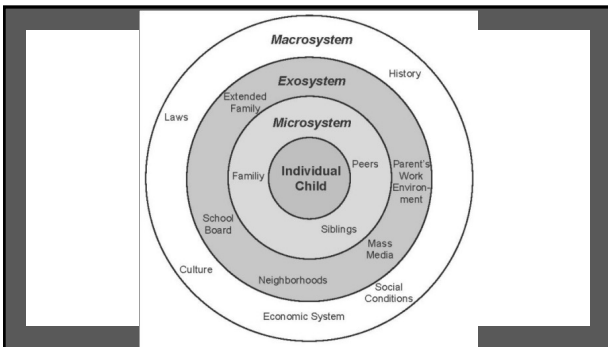

- Ecological systems theory
- External influences of development
- Systems
- Individual at center

*More of EST in the workshop week 3
as this is an important theory for A2!

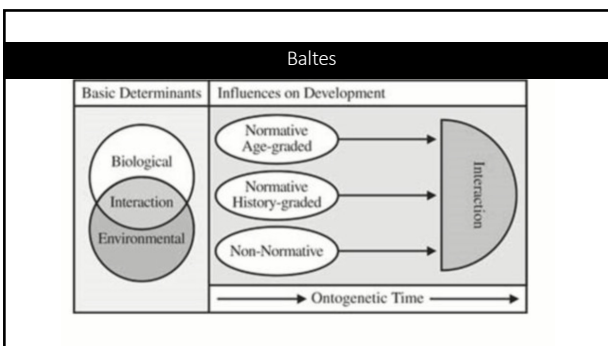

12

13

14

15

Starting school
Age graded
Pokemon go
History graded
Losing your home to an earthquake
Non-normative
Getting married
Age graded
Winning lotto
Non-normative

16

Experiencing Hurricane Katrina
History graded
Puberty
Age graded
Moving across the world
Non-normative
Retirement
Age-graded

17

Piaget

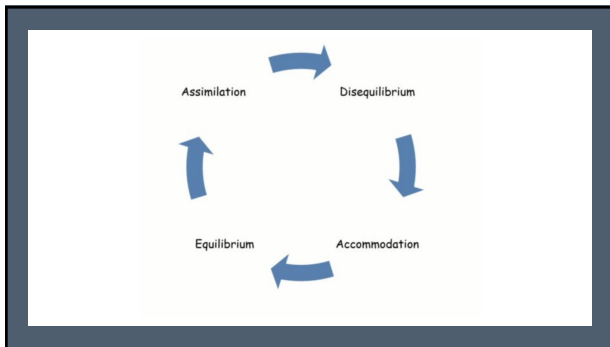

- Shift to INTERNAL drivers
- Stage theories - development happens in stages
- Because we are human human development is universal (rather than context specific)
- They don't discount the environment but see structures within us which influences our development across time and place
- While environmental matters they focus on Internal drivers

18

Cognitive Development theory

- Focuses on INTERNAL driver of cognition
- Schemas
- Assimilation / Accommodation

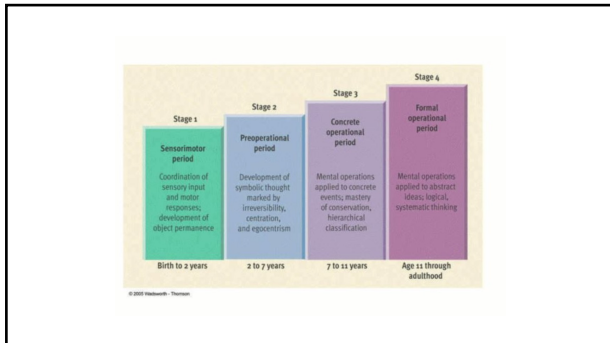

19

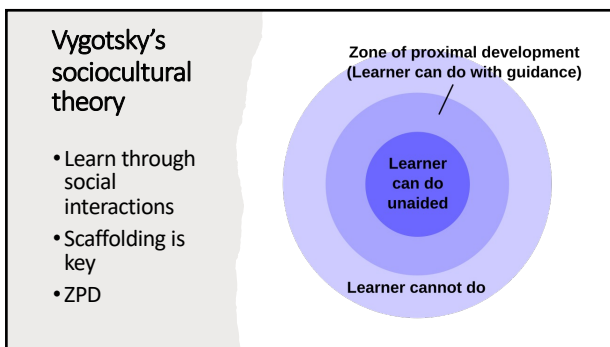

20

21

22

23

Erikson

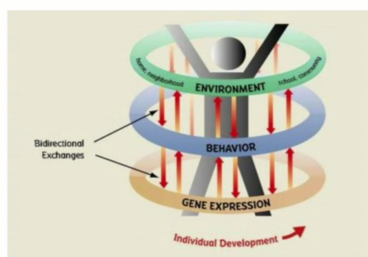

Socio emotional
Relationships, self esteem,
identity, personality
Entire lifespan

24

Psychosocial theory

- Focuses on internal driver of socio-emotional development
- Epigenetic principle
- Normative crisis theory

25

26

Stages of Psychosocial Development

27

Indigenous theories and perspectives

In Aotearoa – Māori and Pacific perspectives

- Kaupapa Māori Theory
- Kaupapa Māori Models of Health and Wellbeing
 - E.g., Te Whare Tapa Whā and Te Wheke
- Pacific perspectives
 - E.g., Collective values and beliefs and Va (sustained, reciprocal connection)

28

- Can you see yourself in these theories?
- Which of these theories seem useful to understanding human development to you?

29

Coming up

Tomorrow: Week 2 Workshop will focus on consolidation of theorists

Week 3 – Lecture

- Māori and Pacific perspectives of human development

Guest lecturers

- John Tupouniua and Emma Quigan

30
