Welcome to 275.102 Human Development!!

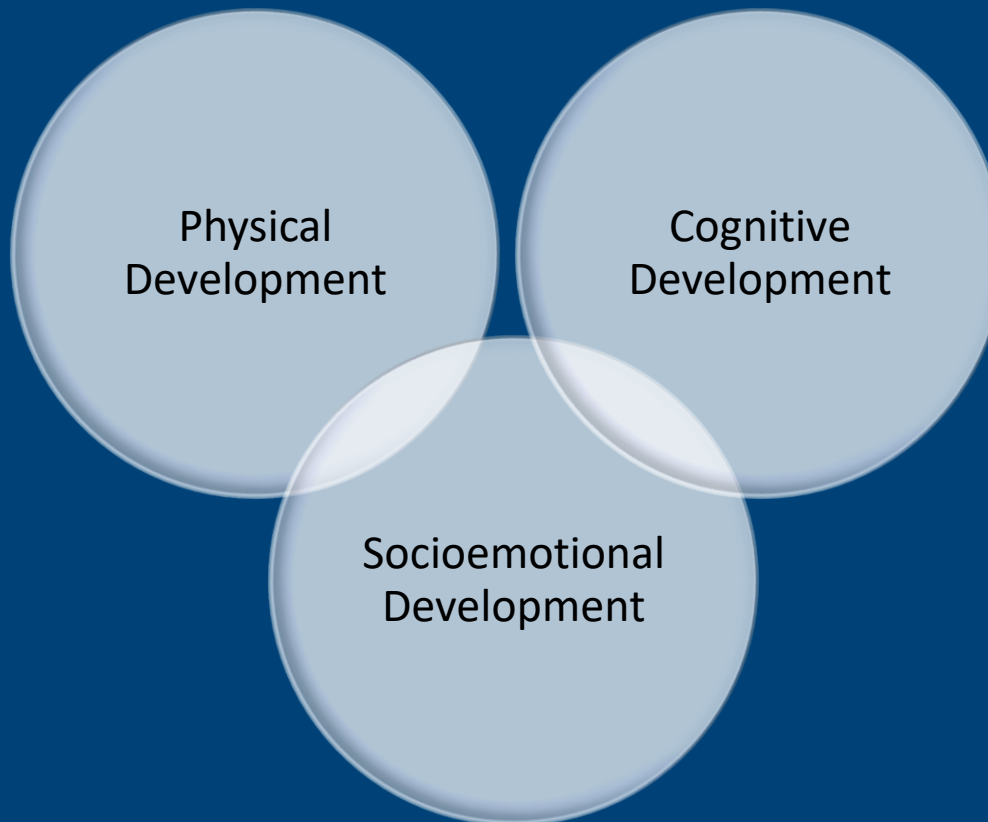

Week 1 – The Lifespan Perspective

- According to Paul Baltes, development is...
 - Lifelong
 - Multidimensional
 - Multidirectional
 - Plastic
 - Contextual (normative age-graded influences, normative history-graded influences and non-normative influences)
 - Development involves growth, maintenance and regulation of loss
 - Development is a co-construction of biology, culture and the individual
- ...and therefore, developmental science is **multidisciplinary**.

The three domains of development

Pay particular attention to...

- How we study human development
- The methods that human developmentalists use (i.e., longitudinal studies vs cross sectional studies)
- Key concepts (such as developmental patterns of aging and the four types of age)
